

# KULAKOV NIKITA VASILYEVICH

Date of birth: 05.06.2003

Saint Petersburg, Russia 📞 +7 924 330 6869

📧 [t.me/klephron](https://t.me/klephron) ✉ [klephron@gmail.com](mailto:klephron@gmail.com) 🔗 [linkedin.com/klephron](https://linkedin.com/klephron) 🐙 [github.com/klephron](https://github.com/klephron)

## ABOUT

Specialist with in-depth knowledge of Linux systems. Interested in configuration and process automation. I enjoy examining various technologies in detail to understand their internal mechanisms. I aim to advance in the field of DevOps by applying my expertise to build efficient and reliable infrastructures.

## EDUCATION

### ITMO

*Master's Degree in System Software*

Saint Petersburg, 2026

5.00/5.00

### ITMO

*Bachelor's Degree in Computer Science and Engineering*

Saint Petersburg, 2024

4.92/5.00

## SKILLS

**Technologies:** Ansible, Docker, GitHub/GitLab Actions, Grafana, Jenkins, Kafka, KVM, Linux, MongoDB, Nginx, PostgreSQL, RabbitMQ, Redis, Prometheus, Terraform

**Technical skills:** Networking troubleshooting & diagnostics, System performance tuning

**Languages:** C/C++ (Boost), Java (Spring Boot, Spring Cloud, Micronaut), Python, JS/TS, Golang, Bash, Rust, SQL, Protobuf

**Foreign languages:** Russian - Native, English - B2

## EXPERIENCE

**ITMO Events** | *Team Lead, Frontend Developer, DevOps* | practice

February 2024 - May 2024

Event and Venue Management System.

- Standardized the API synchronization process and developed an adapter for application interaction, reducing risks related to backward compatibility.
- Configured static code analyzers and merge checks using GitHub Actions for pull requests.
- Deployed a system for client demonstrations while resolving multiple conflicts.

**Bluster Wind** | *DevOps, Backend Developer* | startup, team of 12 members

October 2023 - February 2024

A social network for conducting surveys, creating user profiles based on their votes, and visualizing results on charts according to specified parameters.

- Configured the development server, TLS, Nginx, Liquibase, Keycloak, Container Registry, and self-hosted DinD runners.
- Implemented pipelines for testing, container storage, and server application deployment, accelerating development by 30 percent.
- Developed a user and subscription management module for a monolithic Java Spring application.

## PROJECTS

**Road Condition Monitoring** | *Flutter, Python, Golang, MQTT, Kafka, ClickHouse*

February 2024 - June 2024

Road surface condition monitoring system using drivers' mobile devices.

- Enabled horizontal scaling through well-designed architecture and technology choices.
- Increased system throughput by optimizing bottlenecks identified during load testing.
- Improved prediction accuracy through the development of services for testing and collecting raw sensor data.

**IoT World Simulation** | *C++, CMake, Conan, Python, gRPC, GTest, Protobuf, Docker*

May 2023 - June 2023

A system for modeling real-world processes for devices that collect environmental conditions and affect the system itself. Interaction with devices acting as agents takes place through gRPC.
