About

Specialist with extensive knowledge of Linux systems, with a focus on configuration and process automation. Dedicated to analyzing technologies in detail to gain a deep understanding of their internal mechanisms. Seeking to advance in the field of DevOps by applying expertise to develop efficient and reliable infrastructures.

EDUCATION

ITMO Saint Petersburg, 2026 5.00/5.00

Master's Degree in System and Application Software

Saint Petersburg, 2024

Bachelor's Degree in Computer Science and Engineering

4.92/5.00

SKILLS

ITMO

Technologies: Ansible, CMake, Docker, Git, GitHub/GitLab Actions, Grafana, Jenkins, Kafka, KVM, Linux, Make,

MongoDB, Nginx, PostgreSQL, RabbitMQ, Redis, Prometheus, Terraform

Technical skills: Networking troubleshooting & diagnostics, System performance tuning

Languages: C/C++ (Boost), Java (Spring Boot, Spring Cloud, Micronaut), Python, JS/TS, Golang, Bash, Rust, SQL,

Protobuf

Foreign languages: Russian - Native, English - B2

EXPERIENCE

ITMO Events | Team Lead, Frontend Developer, DevOps | practice

February 2024 - May 2024

Event and Venue Management System.

- Standardized the API synchronization process and developed an adapter for application interaction, reducing risks related to backward compatibility.
- Configured static code analyzers and merge checks using GitHub Actions for pull requests.
- Deployed a system for client demonstrations while resolving multiple conflicts.

Bluster Wind | DevOps, Backend Developer | startup, team of 12 members

October 2023 - February 2024

A social network for conducting surveys, creating user profiles based on their votes, and visualizing results on charts according to specified parameters.

- Configured the development server, TLS, Nginx, Liquibase, Keycloak, Container Registry, and self-hosted DinD runners.
- Implemented pipelines for testing, container storage, and server application deployment, accelerating development by 30 percent.
- Developed a user and subscription management module for a monolithic Java Spring application.

PROJECTS

Road Condition Monitoring | Flutter, Python, Golang, MQTT, Kafka, ClickHouse

February 2024 - June 2024

Road surface condition monitoring system using drivers' mobile devices.

- Enabled horizontal scaling through well-designed architecture and technology choices.
- Increased system throughput by optimizing bottlenecks identified during load testing.
- Improved prediction accuracy through the development of services for testing and collecting raw sensor data.

IoT World Simulation | C++, CMake, Conan, Python, qRPC, GTest, Protobuf, Docker

May 2023 - June 2023

A system for modeling real-world processes for devices that collect environmental conditions and affect the system itself. Interaction with devices acting as agents takes place through gRPC.
